1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1-3 and 11-17 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Fandrianto et al.

Rejection grounds continue to be those set forth in the previous office action (Paper No. 7, paragraph 4).

3. Claims 1-3, 11-12 and 14-17 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Thi et al.

Rejection grounds continue to be those set forth in the previous office action (Paper No. 7, paragraph 6).

4. Claims 22-27 and 31-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fandrianto et al.

Rejection grounds continue to be those set forth in the previous office action (Paper No. 7, paragraph 8).

5. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fandrianto et al. in view of Lim et al.

Rejection grounds continue to be those set forth in the previous office action (Paper No. 7, paragraph 9).

6. Claims 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fandrianto et al. in view of Lim et al as applied to claim 4 above, and further in view of Nguyen et al.

Rejection grounds continue to be those set forth in the previous office action (Paper No. 7, paragraph 10).

7. Claims 22-27 and 31-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thi et al.

Rejection grounds continue to be those set forth in the previous office action (Paper No. 7, paragraph 14).

8. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Thi et al. in view of Lim et al.

Rejection grounds continue to be those set forth in the previous office action (Paper No. 7, paragraph 15).

9. Claims 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thi et al. in view of Lim et al as applied to claim 4 above, and further in view of Nguyen et al.

Rejection grounds continue to be those set forth in the previous office action (Paper No. 7, paragraph 16).

10. Applicant's arguments filed on 10-20-04 have been fully considered but they are not persuasive.

Applicant, in his remarks, argues a major point that:

"The Examiner contends that each of Fandrianto, Duncan and Thi discloses all the features of applicant's independent claims 1 and 11. Applicant respectfully disagrees.

Although Fandrianto, Duncan and Thi arguably disclose computation units and word conditioning logic, these components are disposed along a single datapath where the word conditioning functionality is incorporated into the computation unit....

Unlike applicant's claimed invention, none of the references that are relied on by the Examiner *show or suggest providing a separate datapath from the output of the computation unit to a storage destination, where signals on the datapath are propagated through word conditioning logic, in addition to a critical path through which signals are propagated from the input of the computation unit to its output without propagating through the word conditioning logic*, as specified in claims 1 and 11." (emphasis added).

With respect to the arguments, the examiner carefully reviews all the applied references and claims 1 & 11.

First, the examiner believes claims 1 & 11 broadly recite a serial connection of "computation unit" (e.g, element 101 of Fig. 1a), "word conditioning logic" (element 150) and "storage destination" (element 100). Second, (1) Frandrianto et al, e.g., see Fig. 13, disclose a MPY (604) and (elements 626, 628) which are considered the claimed "computation unit" and "word conditioning logic", respectively. It is noted that Frandrianto et al do NOT show the claimed "storage destination"; however, the result of element (628) should be stored in memory means; and (2) Thi, e.g., see Fig. 34, discloses "computation unit" (4030-4046), "word condition logic" (4048, 4052 & 4050)

and "storage destination" (4026). It would have been obvious to a person having ordinary skill in the art at the time the invention was made the claims 1 & 11 read on either Fandrianto et al or Thi. Therefore, the rejections are still proper.

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
